Subject: APT-Satellites: Report NOV 01, 1993
To: ham-space@ucsd.edu

Observed at station 50.7 NLat, 7.1 ELon, NOV 01, 1993

NOAA-9: APT 137.62 On
NOAA-10: APT 137.50 *OFF*
NOAA-11: APT 137.62 On
NOAA-12: APT 137.50 On
Meteor 2-21: APT 137.85 On
Meteor 3-3: APT 137.30 On

NOAA-10 is in VHF-conflict with NOAA-12, N10-APT is off.
The Signal of Meteor 2-21 is weak as before, I think
there is no hope that this will become better. Meteor 3-3
transmits good vis-images from noon-descending passes.
